TO: All Source 1 Customers

SUBJECT: Good news on the new EON ECM motors for service replacement!

The new EON ECM control modules can be mounted to the old 2.3 style motors. You will no longer have to replace the motor as well as the module.

When placing an order for a programmed or an unprogrammed module you will also receive a black adapter ring. (see picture). This adapter ring will allow the EON ECM module to be mounted to the older generation 2.3 motors.

We continue to get questions on what part numbers to use for those customers that program their own motors/modules, so here are the part numbers again.

| Descripton | Old 2.3 Part Number | New EON Part Number |
|------------------------------------|---------------------|---------------------|
| 1/3 HP Motor | S1-02435313000 | S1-02436072000 |
| 1/3 HP Unprogrammed Control Module | S1-02435314000 | S1-02436078000 |
| 1/2 HP Motor | S1-02431940000 | S1-02436073000 |
| 1/2 HP Unprogrammed Control Module | S1-02432013000 | S1-02436079000 |
| 3/4 or 1 HP Motor | S1-02431941000 | S1-02436074000 |
| 3/4 HP Unprogrammed Control Module | S1-02432014000 | S1-02436080000 |
| 1 HP Unprogrammed Control Module | S1-02432015000 | S1-02436081000 |
